Summary

This is a comprehensive policy covering prior authorization and quantity limit requirements for antihyperlipidemic agents.

Policy

No Requirements

BCBSMA formulary coverage options for anti-hyperlipidemic agents that do not have any coverage requirements include:

•	Atorvastatin	•	Fenofibrate	•	Niacin ER
•	Colesevelam	•	Fluvastatin	•	Omega-3 Ethyl Ester
•	Colestipol	•	Gemfibrozil	•	Pravastatin
•	Ezetimibe	•	Icosapent Ethyl	•	Rosuvastatin
•	Ezetimibe-Simvastatin	•	Lovastatin	•	Simvastatin

Prior Authorization Criteria

Length of Approval	12 months, unless otherwise specified in prior authorization criteria	
Formulary Status	All requests must meet the Prior Authorizations requirement. For non-covered medications, the member <u>must</u> also have had a previous treatment failure with, or contraindication to, <u>at least two</u> covered formulary alternatives when available. See section on <u>individual consideration</u> for more information if you require an exception to any of these criteria requirements for an atypical patient.	
Member cost share consideration	A higher non-preferred cost share may be applied if an exception request is approved for coverage of a non-preferred or a non-formulary/non-covered drug.	

Formulary status/requirements of the medications affected by this policy:

Drug	Formulary Status (BCBSMA Commercial Plan)	Requirement	Additional Considerations
Evkeeza [™] (evinacumab)	Covered, PA		
Juxtapid ® (lomitapide)	Covered, PA		
Nexletol [™] (bempedoic acid)	Covered, PA, QCD	PA required.	N/A
Nexlizet [™] (bempedoic acid and ezetimibe)	Covered, PA, QCD	See below for criteria.	
Leqvio ® (inclisiran) *	Covered, PA		*SPBO - Pharmacy benefit
Praluent ® (alirocumab) *	Covered, PA, QCD		coverage only
Repatha [™] (evolocumab) *	NCNF, PA, QCD	PA and Non formulary criteria required	

PA – Prior Authorization; QCD – Quality Care Dosing (refer to policy #621b); SPBO – Specialty Pharmacy access; NFNC – Non-formulary, non-covered

Evkeeza TM

Evkeeza may be considered **MEDICALLY NECESSARY** and may be covered when <u>ALL</u> of the following criteria are met:

- 1. A confirmed diagnosis of Homozygous Familial Hypercholesterolemia (HoFH); AND
- 2. Used as adjunct therapy to diet and maximally tolerated statin therapy in combination with ezetimibe; **AND**
- 3. Recent cholesterol labs with values (<12 months ago); AND
- 4. Current treatment with Praluent® or Repatha[™], unless clinically contraindicated to PCSK9s.

Juxtapid ®

Juxtapid may be considered **MEDICALLY NECESSARY** and may be covered when <u>ALL</u> of the following criteria are met:

- 1. A confirmed diagnosis of Homozygous Familial Hypercholesterolemia (HoFH); AND
- Used as adjunct therapy to diet and maximally tolerated statin therapy in combination with ezetimibe; AND
- 3. Recent cholesterol labs (< 12 months) with values OR used LDL apheresis.

Legvio ®

Leqvio may be considered **MEDICALLY NECESSARY** and may be covered when <u>ALL</u> of the following criteria are met:

Initial Request

- 1. A confirmed diagnosis of:
 - a. Primary hyperlipidemia; OR
 - b. Heterozygous Familial Hypercholesterolemia (HeFH); OR
 - c. Established cardiovascular disease; AND
- 2. Age ≥18 years old; AND
- Evaluation in a lipid program staffed by a board-certified cardiologist or endocrinologist;
 AND
- 4. Recent LDL labs with values (<12 months); AND
- Used as adjunct therapy to diet and maximally tolerated statin therapy in combination with ezetimibe; OR Previous treatment failure with 3 statin medications (at least 2 of which are high potency) in combination with ezetimibe; AND
- 6. Previous treatment failure with Praluent

Initial approval duration: 3 months (encompassing one 6-month shot) initial approval.

Continuation Request:

- 1. Adherence to current therapy verified with claims data; AND
- 2. Current (<3 months ago) submitted lab values show maintained improvement in LDL levels.

Continued coverage duration: 12 months approval.

Nexletol TM and Nexlizet TM

Nexletol or **Nexlizet** may be considered **MEDICALLY NECESSARY** and may be covered when <u>ALL</u> of the following criteria are met:

- 1. A confirmed diagnosis of:
 - a. Heterozygous Familial Hypercholesterolemia (HeFH); OR
 - b. Established cardiovascular disease; AND
- 2. Age >18 years old; AND
- Evaluation in a lipid program staffed by a board-certified cardiologist or endocrinologist;
 AND
- 4. Recent LDL labs with values (<12 months); AND

5. Used as adjunct therapy to diet and maximally tolerated statin therapy.

Praluent®

Praluent may be considered **MEDICALLY NECESSARY** and may be covered when <u>ALL</u> of the following criteria are met:

Initiation Requests

- 1. A confirmed diagnosis of:
 - a. Heterozygous Familial Hypercholesterolemia (HeFH); OR
 - b. Homozygous Familial Hypercholesterolemia (HoFH); OR
 - c. Established cardiovascular disease; AND
- 2. Evaluation in a lipid program staffed by a board-certified cardiologist or endocrinologist; AND
- 3. Recent LDL labs with values (<12 months); AND
- 4. Used as adjunct therapy to diet and maximally tolerated statin therapy in combination with ezetimibe; **OR**
- 5. Previous treatment failure with 3 statin medications (at least 2 of which are high potency) in combination with ezetimibe.

Initial approval duration: 3 months approval.

Continuation Requests

- 1. Adherence to current therapy verified with claims data; AND
- 2. Current (<3 months ago) submitted lab values show maintained improvement in LDL levels. <u>Continued coverage duration:</u> 12 months approval.

Repatha TM

Repatha may be considered **MEDICALLY NECESSARY** and may be covered when <u>ALL</u> of the following criteria are met:

Initiation Requests

- 1. A confirmed diagnosis of:
 - a. Heterozygous Familial Hypercholesterolemia (HeFH); OR
 - b. Homozygous Familial Hypercholesterolemia (HoFH); OR
 - c. Established cardiovascular disease; AND
- 2. Evaluation in a lipid program staffed by a board-certified cardiologist or endocrinologist; AND
- 3. Recent LDL labs with values (<12 months); AND
- 4. Used as adjunct therapy to diet and maximally tolerated statin therapy in combination with ezetimibe OR previous treatment failure with 3 statin medications (at least 2 of which are high potency) in combination with ezetimibe; **AND**
- 5. Previous treatment failure with Praluent

Initial approval duration: 3 months approval.

Continuation Requests

- 1. Adherence to current therapy verified with claims data; AND
- 2. Current (<3 months ago) submitted lab values show maintained improvement in LDL levels. Continued coverage duration: 12 months approval.

Prior Use Criteria

The plan uses prescription claim records to support criteria for prior use within previous 130 days or the trial and failure of formulary alternatives when available. Additional documentation will be required from the provider when historic prescription claim data is either not available or the medication fill history fails to establish criteria for prior use or trial and failure of formulary alternatives. Documentation will also be required to support any clinical reasons preventing the trial and failure of formulary alternatives. Please see the section on documentation requirements for more information.

Provider Documentation Requirements

Documentation from the provider to support a reason preventing trial of formulary alternative(s) must include the name and strength of alternatives tried and failed (if alternatives were tried, including dates if available) and specifics regarding the treatment failure. Documentation to support clinical basis preventing switch to formulary alternative should also provide specifics around clinical reason.

Individual Consideration (For Atypical Patients)

Our medical policies are written for most people with a given condition. Each policy is based on peer reviewed clinical evidence. We also take into consideration the needs of atypical patient populations and diagnoses.

If the coverage criteria outlined is unlikely to be clinically effective for the prescribed purpose, the health care provider may request an exception to cover the requested medication based on an individual's unique clinical circumstances. This is also referred to as "individual consideration" or an "exception request."

Some reasons why you may need us to make an exception include: therapeutic contraindications; history of adverse effects; expected to be ineffective or likely to cause harm (physical, mental, or adverse reaction).

To facilitate a thorough and prompt review of an exception request, we encourage the provider to include additional supporting clinical documentation with their request. This may include:

- Clinical notes or supporting clinical statements;
- The name and strength of formulary alternatives tried and failed (if alternatives were tried) and specifics regarding the treatment failure, if applicable;
- Clinical literature from reputable peer reviewed journals;
- References from nationally recognized and approved drug compendia such as American Hospital Formulary Service[®] Drug Information (AHFS-DI), Lexi-Drug, Clinical Pharmacology, Micromedex or Drugdex[®]; and
- References from consensus documents and/or nationally sanctioned guidelines.

Providers may call, fax or mail relevant clinical information, including clinical references for individual patient consideration, to:

Blue Cross Blue Shield of Massachusetts Pharmacy Operations Department 25 Technology Place Hingham, MA 02043 Phone: 1-800-366-7778

Fax: 1-800-583-6289

We may also use prescription claims records to establish prior use of formulary alternatives or to show if step therapy criteria has been met. We will require the provider to share additional information when prescription claims data is either not available or the medication fill history fails to establish use of preferred formulary medications or that step therapy criteria has been met.
